## Relationships and Social Cognition Lab

### Spend Time Playing with Emotions

We are investigating the development of children's ability to recognize and understand other people's emotions.

If your family decides to participate, your child will play a handful of interactive games related to emotions and self-control for 1 hour. While your child is playing these games, you will fill out a questionnaire about your child and family.

1

#### WHO

Typically developing  
5-8 years old children

2

#### WHERE

On UC Berkeley  
Campus  
Study investigator:  
Ozlem Ayduk, Ph.D.

3

#### PARTICIPATE

Participation is voluntary  
You can reach us at:  
[childresearchberkeley@gmail.com](mailto:childresearchberkeley@gmail.com)

#### FOR YOUR CHILD

Get your child interested in science by playing interactive games.

#### FOR YOUR FAMILY

Receive a small prize for your child and get \$20 for yourself.

#### FOR SCIENCE

Help the broader scientific community learn more about child development.
